

Bardessono Courtyard Fountains

Richard Hestekind

Bardessono Courtyard Fountains

The Bardessono, a 62-room hotel, restaurant and spa complex in Yountville, California opened in early February, 2009. Described as one of the nation's most energy efficient hotels, the Bardessono also features a number of unique courtyards.

Richard Hestekind was commissioned in 2007 by developer Phil Sherburne to create a series of sculptural water features within these courtyards.

Each of the features presents different ways water springs up and out of stone as it continues its life-sustaining journey.

Magnolia Courtyard Fountains

Crypress Courtyard Fountain

Olive Courtyard Fountain

Birch Courtyard Fountain

Restaurant Terrace Fountains

About this book:

RICHARD HESTEKIND, sculptor, studied under George Tsutakawa at the University of Washington. For over thirty years Richard has designed and created numerous award-winning gardens and fountains showcasing the amazing qualities of stone. His artistry has been recognized both locally and nationally. Contact info: (425) - 204 - 0237

JIM BALLARD, photographer. Jim is a professional photographer and teacher in the Seattle area. Represented by Getty Images for over ten years, he also shoots assignment work locally and nationally.
